About Me

I am a dedicated self-taught full-stack developer passionate about designing and building scalable digital experiences. I take system design and planning seriously, ensuring applications are efficient, user-friendly, and maintainable. With expertise spanning front-end, back-end, UI/UX, and DevOps, I am committed to delivering high-quality, structured solutions.

Technical Skills

- **Languages:** HTML, CSS/Sass, JavaScript/TypeScript, Python, Dart
- **Frontend:** React, Flutter, UI/UX Design (Figma, Adobe XD)
- **Backend:** Express.js, Flask, Node.js
- **Database:** MongoDB, Firebase
- **DevOps & CI/CD:** Docker, GitHub Actions, Vercel, Render
- **System Design:** Microservices Architecture, API Development, Scalable Systems

Work Experience

Full-Stack Developer | Tapiwa Khalid | June 2024 - December 2025

- Developed and deployed full-stack applications using React, Flask, and Express.js.
- Designed intuitive UI/UX experiences with Figma and Adobe XD.
- Developed RESTful APIs for authentication, data processing, and real-time interactions.
- Implemented CI/CD pipelines using Docker and GitHub Actions.
- Planned and structured scalable system architectures to optimize performance.

Projects

Social Media App

A feature-rich social media platform using the MERN stack. It allows users to create accounts, share posts, interact through comments and likes, and follow other users. Built with real-time updates and authentication for a seamless experience.

<https://github.com/BlessingLuphahla/social-media>

Redd Tube / Axe Media

A YouTube-inspired video-sharing application built with React. Users can browse content, switch between dark/light themes, and authenticate accounts. The sleek UI enhances the video consumption experience.

<https://github.com/BlessingLuphahla/Redd-Tube>

Social Media REST API

A high-performance backend API designed for social interactions. It manages user authentication, profiles, posts, and friend connections using Node.js and Express.

<https://github.com/BlessingLuphahla/social-media-rest-api>

Restaurant React App

A visually appealing restaurant website designed with TypeScript and React. It features an interactive menu, online ordering, and an intuitive user interface, enhancing the dining experience.

<https://github.com/BlessingLuphahla/restaurant>

Pakama Business Platform Website

A professional website built for Pakama Business. Created using HTML, CSS, and JavaScript, the site provides an online presence with a modern layout and responsive design.

<https://github.com/BlessingLuphahla/pakama-website>

Flutter Calculator App

A simple yet functional mobile calculator built using Flutter. It demonstrates expertise in mobile UI design and cross-platform app development.
