Profile

Self-taught Software Engineer with strong problem-solving skills, adaptability, and discipline. Currently based in the Netherlands and transitioning into hospitality/restaurant work while pursuing a degree in Mechatronics Engineering at Saxion University (2025–2029). Reliable, hardworking, and eager to bring strong teamwork and communication skills into customer-facing roles.

Key Skills

- Customer service & communication

- Teamwork & cooperation

- Adaptability & quick learning

- Time management & reliability

- Problem-solving & conflict handling

- Technical background as a self-taught Software Engineer

Experience

Community & Voluntary Roles
- Assisted with family and community gatherings (food service, hosting guests, setup/cleanup).
- Gained practical experience working under pressure, staying organized, and ensuring guests felt welcome.
- Developed teamwork and customer care skills in informal settings.

Software Engineering Experience
- Self-taught Software Engineer with experience in full-stack development and digital projects.
- Demonstrated discipline, commitment, and the ability to learn independently—transferable strengths for hospitality and customer-facing work.

Education

- High School Graduate (Bulawayo)
- Mechatronics Engineering (BSc), Saxion University, Netherlands (2025 – 2029)
